**Open Source
Intelligence**

OSINT, abbreviazione delle [parole inglesi Open Source INTelligence](#), è l'attività di raccolta di informazioni mediante la consultazione di fonti di pubblico accesso. Nell'ambito di operazioni di intelligence il termine "Open Source" si riferisce a fonti pubbliche, liberamente accessibili, in contrapposizione a fonti segrete o coperte. Non ha nulla a che fare con il [software libero](#), detto appunto *Open Source Software*.

L'OSINT si distingue dalla ricerca perché applica un processo di gestione delle informazioni con lo scopo di creare una specifica conoscenza in supporto di una specifica decisione di un individuo o gruppo.
